 CFM56-5B/-7B All Operators Wires ([19-CFM56-810](#)), ([20-CFM56-857](#))

CFM launched enhanced inspections on certain rotating life limited components to further improve the long-term operational durability of aircraft engines. The enhanced inspections are recommended in the ESM for when the part is inspected at the piece part level during an overhaul.

Qualified sources

The following sources have the specialized tooling and have been qualified by CFM to perform the Immersion UT Inspection procedure for both the high pressure turbine (HPT) forward outer seal (FOS) and the HPT disk:

- GE Engine Services LLC (ACSC)
 Aviation Component Service Centre
 199 Container Place
 201 West Crescentville Road
 Cincinnati, OH 45246
 USA
